Mines and Prospects--Furnaces and Mills

The Rich Ores of the Lark Ledge

Seven Feet of Mineral Running High In Silver With Much in the Red Metal.

Seven feet of ore on the 1100-foot level. the metallic contents of which have maintained an average of 89 ounce of silver and 9 per cent copper, with characteristic values in gold, tells briefly the story of the latest developments in the Lark ledge of the Bingham Con.'s Dalton & Lark system of mines at Bingham. With this and a fund of other equally gratifying information. Robert W. Rogers, who has served the company in the capacity of general superintendent for five years. of general superintendent for five years, came in from camp yesterday, after placing his successor. Charles W. Lawton as custodian of the Dalton & Lark group. Fellx McDonald to direct operations at the Commercial group. This new ore body has been followed up for a considerable distance, and undoubtedly becomes one of the most valuable arsets that has been opened up under the present administration. up under the present administration in the Lead mine vein the condition is an equally satisfactory one, although in this locality copper predominates. The cross-cut, by which the extent of this channel is determined at one point in the ledge, reveals a width of over eighty feet, while another, which has just been made at a station where the monster ledge has slipped, shows a width of twenty-four feet from the hanging wall that contains from 4 to 7 per cent copper, with the usual values 7 per cent copper, with the usual values in silver and gold. Across from this and on the foot wall the condition is entirely different, the ores showing as much as 40 per cent lead, with from 65 to 70 ounces silver; the two bodies separated by an intercurring stratum of limestone. As an evidence of the placer wealth, of which the Lark ledge is capable, the management vesterday is capable, the management yesterday forwarded to the furnaces a lot of ore which was settled for on controls showing 19.75 per cent copper, with 63 ounces silver and some gold. While this class of ore is not abundant, it serves to leaven up the whole and to maintain an average from which dividends in the great camp of copper are derived. From the company's two groups at Bingham, consisting of the Commercial and Dalton & Lark, there is now being forwarded to the smelter an average of 425 tons of ore daily, the output of the former to be increased immediately the new Rand compressor is installed and additional

machine drills are put in operation. My. Rogers, whose active superinten-dency of the company's mines at Bingham, and at which he leaves a most enviable record, will remain at the local offices in the city for a month or more before severing all connection with the company, after which he will leave for California, a large number of friends hoping to see him return fully restored to health.

TWENTY THOUSAND TONS.

November at Con. Mercur Closing on Another Fine Record

Today's run at the Con. Mercur's big mill that rears itself above the camp of Mercur, will close the month on a reduction of 20,000 tons of ore, or thereabouts, said President Dern yesterday, While, the tonnage for the month is not as voluminous as was that of the pre-vious month, the daily average has been about the same, and there is no cause to believe other than that the no cause to believe other than that the earnings have been as satisfactory. Meanwhile, the mill at Manning has been operating steadily on tailings contained in the old gold-hearing dumps at that station, and with the weather continuing as it is at present it will continue. The season at he Manning mill has been an exceptionally favorable one, while results whose that the manning one, while results show that the man-agement was justified in its operation. The new sampler with which the

company is equipping itself is now about completed and with this the management will be enabled to more intelligently determine the contents of its ore before it is passed into the crusher. In the operation of the sampler only such portions of the output will be passed through it as are required to determine the average value of the ore. With conditions at the mine President Dern returns from Nebraska very much pleased, and while he is not exploiting dividends, that they will be resumed is among the porsibilities of 1905.

OUTPUT IS INCREASING

Shipments From Tonopah and Gold-

field for a Week.

This week's returns from the railroad show a large increase in ore shipments, the total amounting to 1648 tons, says the Bonanza of Tonopah. To this tothe Bonanza of Tonopah. To this total the following contributed: Tonopah Mining company, 645 tons bulk, 87
tons sacks; Belmont, 199 tons bulk; Montana-Tonopah, 20 tons bulk, 59 tons
sacks; Tonopah Extension, 50 tons;
Southwest Nevada, Reveille, 70 tons;
Lucky Baldwin, Gold Mountain, 5
tons; Quincey mine, Crow Springs, 59
tons, Goldfield—The Jumbo lenses,
Richards, 16 tons; Bowes, 155 tons; McDonald-Fuller, 194 tons; Combination
mine, 40 tons; January, 44 tons; Florence, 193 tons.

ence, 103 tons. The passenger traffic amounted to over 450 in and 200 out. An enormous amount of incoming freight is being handled, but Dick Dayls, who has been to Reno looking for lost freight. and found it, says the congestion is such that it cannot be cleared for four

The Best Liniment.

"Chamberlain's Pain Balm is considered the best liniment on the market," write Post & Bliss, of Georgia, Vt. No other liniment will heal a cut or bruise so promptly. No other affords such quick relief from rheumatic pains. No other is so valuable for deep seated pains like lame back and pains in the chest. Give this liniment a trial and become acquainted with its remarkable qualities and you will never wish to be without it. For sale by all leading drug-

THE DAY ON 'CHANGE.

Terrific Hammering of May Day and Undermining of New York.

The day on the mining exchange closed on the sale of \$6.551 shares of steck, for which \$8.29.55 was paid, and with the bears, as a rule, again in the ascendant. May Day was one of the particular objects on which their efforts were trained, and after a terrille assault it was broken down to 24 cents, after an opening at 25%. New York, on a victous report that the metallic contents of ore now at the sampler were a disappointment, when in reality returns have not been made on it, flattened out to 20% cents, while Century was shorted down to 17. Ajax, on favorable tidings from the properties, was sought around 17 cents, while Butler was freely dealt in at 12%, with another block of Little Chief finding a refuge among the insiders. Daly West parted with a single lot at \$12.50, with Columbus Con. In good demand around \$1.29 and Yankee Con. at \$7, the day closing on the following market: closed on the sale of 16,561 shares of stock, I AM II PM

Boston Copper Quotations.

Special to The Tribune.

BOSTON, Mass., Nov. 29.—There was a good copper market here today. Commission houses were active buyers at the opening, and traders inclined to take Profits, but the demand more than offset the supply and prices reached a better level. The news is generally bullish and barring accidents we ought to see a much higher market for those shares. The strength of the local issues is liktly to spread to the copper shares and a booming market be seen throughout the list. Flornblower & Weeks, brokers, of State street, Boston, and 19 Wall street, New Yor, furnish the following quota-Special to The Tribune.

The U. S. Company's December Dividend

Tips From the East Confused With Transfer by Centennial to the Parent Organization.

While it is quite positive that the United States Mining company will present its shareholders with a dividend in December, the recent announcement appears to have been premature. The bulletin recently sent out from Boston was, according to information at the local offices, the re-sult of a misapprehension, the treas-urer of the Centennial-Euroka Mining company, which is but one of the big units in the parent company's estate, having simply made a transfer of \$1 a share, or \$100,000, from the treasury of the former to the capacious vaults of the latter, from which the approaching dividend will be paid on the order of the board of directors. A remittance from the United States "Melting" company, which was made around the same date, and which latter, notwithstand-ing its bulk, appears to have been overlooked by those on picket duty, was also placed to the credit of the parent company—all this preliminary to the December distribution. In simito the December distribution. In simi-lar manner the management expects the Mammoth of California, which was the Mammoth of California, which was acquired the present year, to come forward with its contribution to the dividend fund in 1905, the system at Bingham having already done as much, while its fluxes have affored means that enabled the smelting company to attain the most economic ends in the reduction of ores from all sources.

RUMORS ON HALIFAX.

Salt Lake Interests at Tonopah and in Neighboring Camps.

A report has been freely exploited at Tonopah for several days that an important disclosure has been made in the Hallfax group of locations controlled by Senax group of locations controlled by sales after Kearns and Hon. David Keith of this city and associates. There is nothing at the local offices of the company to verify it, while the Miner of that camp says that "inquiry among those couldy connected with the management indicates that there is no foundation for the rumor."

rumor."

Commenting on the campaign at the Reveille mines acquired during the year by Thomas J. Lynch of this city and associates, the Miner says: "Considerable ore is being taken out in the course of development but no stoping is being foncyet. The shipment of twenty carloads of ore was completed Wednesday, pracleally cleaning up the platform at Tono-

The new ore body in the properties of the Nevada-Alpine company, the wealth of which is also pouring into the peckets of the Utahn, has been obsered no along the strike for seventy-five feet, the channel varying from three to eight feet in width with an average of four and one-half. The ore carries the usual percentage of lead and from 250 to 500 onness in silver to the ton, the assay values ranging from 350 to 325. Large quantities of this rich product are now being extracted and forwarded to the smelter at Salt Lake. The output from this wonderful property is now larger than ever and there is every indication that it will be still further increased as soon as the new ore shoot is fully developed. The new ore body in the properties of

RED ELEPHANT ORES.

Another Consignment From the Idaho Producer Reaches Smelter.

W. G. Page, manager of the Red Ele-phant group of mines at Halley, Ida., phant group of mines at Halley, Ida., which is now the property of the Quincy, Jr., Mining company, came down from the North vesterday morning to confer with local interests and in time to witness the sale of the latest lot of ore, the metallic contents of which consisted of 495 ounces in silver, 55 per cent lead and not a little gold. Mr. Page reports that the Red Elephant is in a most satisfactory condition with ore of excellent quality exposed in a number of places, while the new or lower tunnel with which its various channels are to be tapped has now advanced over 200 feet into the group. Meanwhile the concentrator is running Meanwhile the concentrator is running conservatively and putting out a high grade concentrate, while the condition

grade concentrate, while the condition throughout is most encouraging.

The Croesus group of which he is the superintendent continues idle with assurances that it will resume next soring. The Messrs. Kirkpatrick and their associates by whom the Croesus is owned, have expended already a large amount of money, have achieved good results and another season, says Mr. Page, should see the property actively productive.

The usual volume of ore is coming from the Minnie Moore, while at the Tip Top, owned by John Q. Packard of this city, is working steadily and it is said with good results. Mr. Page will leave for the North again next week.

NEW YORK SHIPMENT.

Much Interest Shown in the Lot Now at Sampler.

The liveliest interest in the lot of ore with which the New York of Park City is now at the sampler was manifested during the day, and while there were reports, for bear purposes, that the con-tents were disappointing. Secretary Deming stated positively that the sampling of the consignment had not been completed last night, nor would returns be made to the company until this afternoon some time. It was said last night, however, that the lot would bring the company several thousand dollars, and that Superintendent Mc-Gill knew of what he was talking when he said the mine would be made to take

The Copper Boom Is Here to Stay

A Boston Authority Talks Interestingly on Influences Behind the Present Market.

After an absence of several months luring which he has seen the improvement of his company's resources, the chievements at its furnaces, reflected n the cagerness with which the investor has sought its shares in the East, Hon E L White, president of the Bingham Con. Mining and Smelt-ing company, returned from Boston last night, and on the morrow will leave for the diggings. While not a little exultant over the record that has been made and the heights to which the earnings have been advanced. President White pleaded that he had obligated himself to refrain from any discussion of an initial dividend until it has been authorized by dend until it has been authorized by his colleagues. However, it is not haz-arding much in a prediction that a dividend will be paid before the end of the first quarter of 1905. Discussing the copper market, President White said it was difficult, with the buoyant con-dition behind it, to say where the brakes will be put on, although the dis-restion is to protect the consumer and postion is to protect the consumer and to promote the demand by keeping it around 15 cents. Higher figures, he exround is cents. Higher ngures, he ex-plained, would imperil demand and open the way to substitutes for the metal. At present the market is un-doubtedly very firm. Foreign con-sumption has been big, especially in the manufacture of war material, and with active buying at home added to

with active buying at home added to this it is not unlikely that even greater advances will be recorded.

The condition in the East is a most prosperous one, with the tendency decidedly speculative. In all lines trade is good, with Oriental needs hourly growing and with the needs of 700,000 persons engaged in war to be conserved everything is favorable to a continuance of these conditions.

continuance of these conditions.
Only last week there was experted out of Boston alone to Japan 300,000 bides for use in the manufactories of that Empire. This was a consignment which came under his personal obserwhich came discrete in one of the leather companies. In Utah, President White will remain some time, as Manager MacVichie has much to which to call his attention, with a whole panorams of surprises underground.

The latter, who returned from the Eagle and Blue Bell, on the control of which the Bingham has just made another \$40,000 payment, reports the cutput now averaging sixty tons of ore daily, with the conditions throughout most satisfactory.

NOT VERY FAR OFF.

Eastern Estimates on Earnings From Big Utah Producer.

The United States Mining situation is an improving one. We do not mean to say that the company's smelter difficultiles have been entirely overcome, but better results are certainly being obtained than for some time, and the prospects are for still better results. On the present copper market the company should be earning a strong \$160,000 per month. From the selling of this copper the United States Mining company receives the price ruling sixty days from the time of its shipment. Such a contract works to its advantage on a rising market and to its disadvantage on a declining market, write Hayden, Stone & Co. of Boston, in their market letter. Pollowing is an estimate of what the United States Mining company should be able to do when its California plant is in operation:

Per annum. ties have been entirely overcome, but bet-

From copper, gold and silver out

This will give about \$4 per share for the stock. Its lead plant should start operations soon after the first of the

year.

There will be no annual report of the United States Mining company this year, as the directors consider the proposition still in its construction stages.

The stock market end of United States Mining still gives evidence of accumulation. New York makes the market for it.

FEDERAL WILL SINK.

Shaft on Beaver County Group to

Start Down Again. At a session of the Federal Gold and Copper Mining company's directors during the afternoon, a contract was awarded by which the shaft on its properties in by which the shaft on its properties in Beaver county will be dropped down another 109 feet, it having already attained, under a previous administration, seventy-five feet. In their work it is said the former owners extracted ores of the value of about \$100,000, that which remains on the walls of the old stopes, said a director yesterday, running high up in silver and in appearance identical with much of the ore in the Horn Silver of Frisco. To the vacancy in the board was elected G. R. Cleaveland, the well-known commission man. To inaugurate the new work in the shaft Manager Stuart will leave for camp tonight, while Director E. W. Young will depart for Colorado much pleased with the outlook.

MAMMOTH SHIPMENTS.

Gold and Copper Ores Help Out Contents of the Treasury.

The Mammoth of Tintic continues the most frequent visitor on the "open market," two more lots having been dispowed of during the day, and the proceeds dumped into the company's strong box. The controls on one of these revealed as much as \$25.60 gold, with 7 ounces silver per ton, while in the second lot the contents ruled at 5.8 per cent copper, 9.8 ounces silver and 60 cents gold. The month is closing on a very heavy tonnage, and that the December dividend will be paid as usual, there is apparently no doubt

Mining Notes.

Manager Doolittle has gone to the Dixie nines and smelter out of St, George. A letter from Los Angeles indicates the early departure from that city of Hon-David Keith-for his home in this city.

The management of the Uncle Sam of Tintic yesterday marketed a carload of crude ore with two of concentrates. E. W. Griffiths leaves for Park City his morning to conduct an examination of mining property for Salt Lake clients.

Four carloads of ore from Tonopah passed through the Taylor & Brunton

sampler yesterday on its way to the American's furnaces. Manager Channing of the Utah Con leaves for its Bingham bonanzas that have been drawn on for a new record during the month, this morning.

The Paymaster group of prospects ad-joining the properties of the Utah and Eastern, near St. George, is to be worked under a lease. Many express the belief that it is the making of a mine.

A great deal of solicitude is manifested locally in behalf of Jack Keetley, who is fighting for his life in California, He has many friends whose hear's are with The first clean-up at the new cyanide clant with which the Revenue mines at Norris. Mont., was recently equipped, will begin in a few days, the product to come to Knight & Warnock of this city.

The weekly report by Superintendent Colbath on conditions at the Alfa-Quincy tells of the presence of a new Sissure, the width of which exceeds six teet and in which some mineral is exposed. Meanwhile the main tunnel continues in the direction of the main ledge with the record denoting most economical work.

rd denoting most economical work Articles of the Mt. Estes Mines company were filed with the County Clerk yester lay. J. A. Czizek is president; C. E. Gabie lice-president and secretary; and E. J. Rowe, treasurer. The company has a capital stock of \$300,000, divided into \$300,000 shares of the par value of \$1 each. The company owns options on claims on Estes mountain, in the Yankee Fork mining district, in Custer county, Idaho.
